Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions.

Digital technologies have remarkably changed teenagers' life and work both positively and negatively.

According to UNICEF, 71% of 15–24-year-olds are online and one third of Internet users are under 18 years old.

Teenagers benefit from the advances in technology. They have various devices like computers, tablets, smartphones, and applications to improve the ways they learn, broaden their relationships, and spend their leisure time. They have more opportunities to learn, get access to information, and use different communication channels inexpensively.

However, they also face many risks. First, there is a concern about children's physical and mental health. Statistics show that teens spend less time doing physical activities, and many more teens suffer from obesity, bone and eye problems. Moreover, teens are also at risk of visiting websites which promote self-harm or suicide. In fact, cyber-bullying on the Internet has become more serious than bullying at school.

Schools and parents should guide children so that they can use devices wisely and not become victims of those devices and technologies.

Question 41. The passage is mainly about _____

- A. the benefits of digital technologies
B. the pros and cons of digital technologies
C. the future of digital technologies
D. the risks of digital technologies

Question 42. What does the word "They" in paragraph 2 refer to?

III. Read the following passage and answer the questions. (0.8 pt)

3D printing technology was introduced in the 1980s and has evolved significantly ever since. A 3D printer turns a whole object into thousands of tiny little layers, then makes it from the bottom-up in layers of material. There are many applications of these printers. For example, they are used to create medical implants, household items, and fashion accessories.

One of the major advantages of 3D printers is that they make use of different kinds of materials like plastic, metal, or food ingredients. Therefore, by using 3D printers, people can reduce material waste. In addition, they can create complex and customised objects that traditional manufacturing methods cannot produce.

However, there are some drawbacks to consider. 3D printing can be time-consuming, especially for large or tiny objects. Also, the cost of purchasing and maintaining a 3D printer can be relatively high. The quality of the printed objects may vary depending on the type of printer and materials used. Certain materials used in 3D printing, such as plastics, may not be as durable as those produced through traditional manufacturing methods.

Despite these drawbacks, 3D printing continues to expand its applications. With ongoing advancements, it opens the door to even greater innovation and creativity.

Question 1. When was 3D printing technology introduced?

Question 2. What can people reduce by using 3D printers?

Question 3. Why may the quality of a 3D-printed object vary?

Question 4. What does the pronoun "it" in the last paragraph refer to?
